- **Project Management:** Git, GitHub, GitLab, Agile Methodology, Notion, Kanban boards

TECHNICAL PROJECTS

Daily Meal Planner

Source Code: github.com/dev-dominick/daily-meal-planner

- First collaborative front-end application developed to generate meal ideas and recipes based on a protein choice, meal type, and desired calories. Built-in note-pad to jot down your shopping list. Functioning map to display markets in the area based on zip-code.
- Built with JavaScript, HTML, CSS, Bootstrap, Edamam recipe API, and Mapquest API.
- Worked through multiple merge conflicts and learned to store API keys in a .ENV file for security.

Let's Connect API

Source Code: <https://github.com/dev-dominick/lets-connect-api>

- A REST API for a social media application. Functionality includes creating a profile, updating a profile, adding thoughts (posts) to an account, adding friends, and adding reactions to a friend's thoughts (posts).
- Built with Express, Mongoose, and MongoDB. APIs tested with Insomnia.
- Future plan is to build a full MERN stack application integrating this API.

30linesportfishing.com

Source Code: <https://github.com/dev-dominick/FishingCharterDemo>

- Static fishing charter business application collaboratively developed as a freelance project.
- Built with NextJS, React Router, and Material UI. Integrated google maps as a quick navigation measure when users are on a mobile device. Connected fishing booker API to display 30 Line Sportfishing's reviews from fishingbooker.com. Deployed on Netlify.
- Future plans are to rework the User Interface, add a review page for customers to post and browse reviews.

In Progress:

- A photographer's personal portfolio.
- E-Commerce application for trading cards. Will include profiles and payment.

PROFESSIONAL EXPERIENCE

Web Developer

07/2020 - Present

Open-Source / Personal / Student

- Graduated University of Pennsylvania's Full-Stack Coding Bootcamp.
- Continuing to learn by completing online self-paced development curriculums and working on new projects.
- Contributed to Open-Source and freelance projects.
